Wire Pulling Compounds

(Effective 09/01/1999)

The wire pulling compounds known as Yellow 77 (Idi Electric Canada Ltd.) and Wire Aide (Gardner Blender Inc.) utilized as a lubricant in installing electrical conductors in raceways may be used in conjunction with rigid PVC (unplasticized) conduit. These compounds shall not be used with PVC (polyvinylchloride) insulated wire, cables and type RW90EP with polychloroprene covering
